(54) Title: FGF RECEPTOR (FGFR) AGONIST DIMERIC COMPOUNDS, PROCESS FOR THE PREPARATION THEREOF AND THERAPEUTIC USE THEREOF

(57) Abstract: The invention relates to novel heterocyclic compounds which are pyrazolopyridine derivatives that induce fibroblast growth factor receptor (FGFR) dimerization, having the general formula: M₁-L-M₂ in which M₁ or M₂, which may be identical or different, each represent, independently of one another, a monomer unit M and L represents a linker group which links M₁ and M₂ covalently with the monomer unit which follows: Process for the preparation thereof and therapeutic use thereof.
