

ABSTRACT

Air-Drying Type Water-Borne Paint Composition

5 Provided is an air-drying type water-borne paint composition including a
water-borne resin (A) and an emulsion (B) of an ethylene-vinyl acetate copolymer
having an ethylene content ratio of 5 to 50% by mass, wherein a content of the
ethylene-vinyl acetate copolymer is 5 to 50% by mass, relative to a resin solid content
in the air-drying type water-borne paint composition. The air-drying type water-borne
10 paint composition may be a two-pack water-borne paint composition including a first
agent containing the water-borne resin (A) and a second solution containing a curing
agent (C).
