

ROTARY BRUSH TOOL

Abstract

The invention relates to a rotary brush tool which is equipped with a brush assembly (1, 2, 3) and a drive (1, 4) with a drive housing (1) and an output shaft (4) for the brush assembly (1, 2, 3). The brush assembly (1, 2, 3) has a rotatable brush mounting (1) and an annular brush (2, 3) comprising a rim covered with bristles (3) which protrude outwards. According to the invention, the drive housing (1) of the drive (1, 4) functions as a brush mounting (1) which can be rotated relative to the fixed output shaft (4).
