

Abstract

The invention relates to an escalator 10 with a step belt 18 or a moving walkway 50 with a plate belt 58. This has a first deflecting region 13, 53 and a second deflecting region 14, 54, wherein the plate belt 58 or the step belt 18 is arranged to circulate between the first deflecting region 13, 53 and the second deflecting region 14, 54. The escalator 10 or moving walkway 50 includes at least one guide rail 16, 56, 56A, 56B, which is arranged between the deflecting regions 13, 14, 53, 54, for guidance of the step belt 18 or plate belt 58, as well as at least one support 66, which is arranged between the deflecting regions 13, 14, 53, 54, for supporting to the at least one guide rail 16, 56, 56A, 56B. The at least one support 66 comprises a plurality of plug parts 101, 102, 103, 104, 105, 106 which in the assembled state can be plugged together by means of plug connections 111, 121, 131 to form a box-shaped support base body 100.
