

A DEFLECTION YOKE LINER WITH SUPPORT RIDGES

ABSTRACT

A deflection yoke for a cathode ray tube includes a pair of vertical deflection coils (4, Fig. 4), a pair of horizontal deflection coils (3, Fig. 4) and a rigid separator (2') or yoke liner isolating the pairs of deflection coils from each other. The separator has a constant
5 thickness and has on its inside face (11) supporting ridges (20,21) of a variable height for supporting the horizontal deflection coils.
