

SPECIAL NEGATIVE PRESSURE MASSAGE DEVICE FOR WOMEN AND MASSAGE STRUCTURE THEREOF

ABSTRACT

5 A female-specific massage device and massage structure thereof are disclosed. The
message structure includes a cup body and a sheath ring. The cup body has a cavity, and two
ends of the cup body are an open end and a closed end respectively, and a cup rim is formed at
the open end, and a connection hole is formed at the closed end and communicates with the
cavity. The sheath ring includes a ring body and a fixing portion extended outwardly from
10 the ring body, and the ring body sheathes the cup rim, and the fixing portion is extended into
the cavity. In this way, the massage device and structure not just provide a massage to the
reproductive organ only, but also provide a massage to the acupuncture points around the
reproductive organ.
