(54) Title: REALIZING RANDOM ACCESS CHANNEL-LESS LAYER 1/LAYER 2 TRIGGERED MOBILITY

FIG. 10.

(57) Abstract: In general, the current subject matter relates to realizing random access channel layer-less (RACH-less) layer 1/layer 2 triggered mobility (LTM). In some implementations, realizing RACH-less LTM can include receiving, at at least one LTM target cell of a base station, information indicative of whether handover (HO) of service for a user equipment (UE) currently being served by a serving DU of the base station can be a random access channel-less (RACH-less) HO to the at least one target cell or can be a RACH-based HO to the at least one target cell, and preparing the at least one LTM target cell, based on the information received at the at least one LTM target cell, for one of RACH-less HO and RACH-based HO.
