

## ABSTRACT

The embodiments of the disclosure provide a method and device for Sounding  
5 Reference Signal (SRS) transmission. The method includes that: User Equipment (UE)  
determines an active uplink Bandwidth Part (BWP); the UE determines an SRS  
parameter configuration corresponding to the active uplink BWP; and the UE  
transmits an SRS on the uplink BWP according to the SRS parameter configuration.  
With adoption of the embodiments of the disclosure, SRS transmission flexibility can  
10 be improved.
