ABSTRACT

SHUNTED ELECTRICAL CONNECTOR

5 A modular jack type electrical connector (10)
includes a dielectric housing (12) defining a plug-
receiving cavity (20) open at one end (24) of the housing.
A plurality of terminals (14) are mounted on the housing
with contact portions (28) extending into the cavity. A
shunt (16) bridges at least a pair of the terminals. A
passive electrical component (18) is coupled directly to
10 the shunt on the connector.
