What is claimed is:

1. A transgenic Pristella comprising a chromosomally integrated expression cassette encoding a fluorescent protein, wherein the Pristella comprises the “Green Pristella 1 transformation event”.

2. The transgenic Pristella of claim 1, further defined as a fertile, transgenic Pristella.

3. The transgenic Pristella of claim 1, wherein the fish is homozygous for the integrated expression cassette.

4. The transgenic Pristella of claim 1, wherein the fish is heterozygous for the integrated expression cassette.

5. A progeny of a transgenic Pristella of claim 1 that comprises a chromosomally integrated expression cassette encoding a fluorescent protein, wherein the Pristella and progeny exhibit fluorescence and comprise the “Green Pristella 1 transformation event”.

6. The progeny fish of claim 5, further defined as a fertile, transgenic Pristella.

7. The progeny fish of claim 5, wherein the fish is homozygous for the integrated expression cassette.

8. The progeny fish of claim 5, wherein the fish is heterozygous for the integrated expression cassette.

9. The transgenic Pristella of claim 1, wherein cryopreserved sperm comprising the Green Pristella 1 transformation event having been deposited at the ATCC as Accession No. (PTA-127162).
