
ABSTRACT

A method and apparatus for interaction information processing, a terminal, a storage medium, and a program product are provided, which relate to the field of application development technologies. The method is executable by a terminal, and includes: displaying a battle interface of a multiplayer online battle, the battle interface including a target virtual object (201); displaying an interaction icon presentation region in response to an icon presentation operation for the target virtual object, the interaction icon presentation region including at least one candidate interaction icon (202); receiving a selection confirmation operation for a target interaction icon in the at least one candidate interaction icon (203); and displaying interaction information corresponding to the target interaction icon at an interaction presentation position corresponding to the target virtual object (204). With the technical solutions provided in the embodiments of this disclosure, operation of displaying interaction information can be simplified.
