CLAIMS

1. Wig comprising:

a base fabric;

front false hairs implanted on a front surface of the base fabric;

a lining member with a predetermined thickness, attached to a back surface of the base fabric; and

back false hairs implanted in the lining member,

wherein the front false hairs are implanted at least in a region near an outer edge that is at least a part of an outer periphery of the base fabric,

the lining member is disposed such that an outer end face of the lining member is positioned away from the outer edge of the base fabric,

the back false hairs extend outward from the outer edge of the base fabric, and

the outer end face of the lining member has a corrugated shape in plan view from the back surface.

2. The wig according to claim 1, wherein

the outer edge of the base fabric is a front edge, and

the outer end face of the lining member is a front end face.

3. The wig according to claim 1 or 2, wherein

no false hair is implanted in a region between the outer edge of the base fabric and the outer end face of the lining member in the back surface of the base fabric.

4. The wig according to any one of claims 1 to 3, wherein the outer edge of the base fabric has a uniformly-convex curved shape.

5. The wig according to any one of claims 1 to 4, wherein the lining member is formed of a belt-shaped member having a predetermined width.
