(54) Title: METHOD AND SYSTEM FOR MOBILE REMITTANCE

(57) Abstract: Methods and systems of mobile remittance that are network-agnostic and that allow transfer of funds across any network, regardless of whether these networks have funds transfer agreements with each other. In accordance with aspects of the present invention, the methods and systems of mobile remittance transactions are easy to use and secure, and ensure that the mobile remittance reaches the intended recipient, regardless of whether the recipient is in an urban or rural area.
