(54) Title: AN INK FEED ARRANGEMENT FOR A PRINT ENGINE

(57) Abstract: An ink feed arrangement (702) for feeding ink to a print engine (500) includes a spine portion (704). A casing (706) is mounted over the spine portion (704), the spine portion (704) and the casing (706) defining a plurality of parallel, but isolated, ink supply galleries (708). A plurality of substantially aligned, spaced ink feed outlets (750) are defined in the spine portion (704) for feeding inks to the printhead (516). A feed passage (710) is associated with each outlet for placing that outlet in fluid communication with one of the galleries (708).
