

ABSTRACT**LINKING STRUCTURE FOR STUD FOR UNIT HOUSE**

5 An object is to provide a coupling structure of a stud for a prefabricated house which is durable so as to be used repeatedly and which can enhance appearance design.

10 A fixed nut 11 is previously fixed to a stud 10. A fixed bolt 12 is provided which screws to the fixed nut 11 so as to fix coupling pieces 21 to the stud 10. Sealing members 13 are previously provided along the left and right coupling side surfaces of the stud 10. The sealing members 13 are used to seal gaps between the stud 10 and wall panels 20. A cover member 14 is provided which engages with the gap of the wall panels 20 on an indoor side.
