METHODS AND SYSTEMS FOR MODIFYING LOCATION INFORMATION OF A REQUEST

ABSTRACT

The present disclosure relates to systems and methods for modifying location information of a request. The systems may perform the methods to receive, from a first user terminal associated with a service requester, at least one modification of a request for transportation service, wherein the at least one modification comprises at least one of a modified pickup-location or a modified destination; identify a service provider associated with the request for transportation service; generate updated information related to the request for transportation service based on the at least one modification of the request for transportation service; and send, to a second user terminal associated with the service provider, the updated information related to the request for transportation service.
