

ABSTRACT**PHARMACEUTICAL COMPOSITION COMPRISING AN HMG-CoA
REDUCTASE INHIBITOR AND AN ACE INHIBITOR**

Fixed pharmaceutical compositions comprising an HMG-CoA reductase inhibitor,
atorvastatin, and an antihypertensive agent, perindopril, and use of said compositions in
the treatment and prevention of cardiovascular diseases and more especially coronary
events in patients with a past history of myocardial infarction and/or of revascularisation
in association with primary hypercholesterolaemia or mixed hyperlipidaemia.
