(54) Title: MATTRESS WITH QUILTED ZONED TOPPER

FIG. 2

(57) Abstract: A quilted zoned topper formed with a quilted panel and a memory foam is disclosed. The quilted panel has a ticking material, a backing material, and a support material having a degree of compression provided between the ticking and backing materials. The ticking material, the support material and the backing material all are quilted together by a stitching pattern providing an increased amount of stitching in a center section of the quilted panel than adjacent head and foot sections of the quilted panel such that the support material pre-compresses in the center section thereby defining a pocket. The memory foam is provided in the pocket. A mattress provided with the quilted zoned topper is also disclosed.
