INVENTOR:

Laurent GROMIER

The present invention concerns a phonic insulation product, intended to be applied to a vertical building wall, and a method of manufacturing said product.

The product successively comprises :

- a first layer in foam of synthetic material, intended to be placed on the wall to be insulated,
- a second layer in a mixture of bitumen, aggregate, and at least one polymer, without a reinforcement, and
- a third layer in a primer material, intended to take a wall covering,
