(54) Title: PRIZE ACQUISITION ARCADE GAME WITH ROBOT

(57) Abstract: An arcade game includes a robot that can be controlled by a player to capture one or more items. The robot may have a human-like appearance including a video display that emulates a human face and grasping pincers that emulate human hands. The robot may provide enhanced playability by interacting with potential players to encourage them to play, by simulating dancing to attract attention and celebrate wins, by speaking to players and potential players through a speaker, and by permitting a remote person to voice the robot and interact with players and potential players in real time.
