(54) Title: CORNEAL REMODELLING CONTACT LENSES AND METHODS OF TREATING REFRACTIVE ERROR USING CORNEAL REMODELLING

(57) Abstract: Contact lenses are described with a corneal remodelling effect. This corneal remodelling effect is one or both of broad-area corneal remodelling and localised remodelling. The contact lenses may also have a refractive power. The refractive power may vary across the lens and for myopia may have increased power centrally. The increased power may be provided over a lens area that has increased thickness due to localised remodelling.
