

## **ABSTRACT**

### **WEARABLE BREATHING TUBE SYSTEM AND BREATHING EQUIPMENT WITH THE SAME**

A breathing tube system includes a gas receiving tube, an output tube and a flame arrester. The gas receiving tube is configured to receive a breathing gas. The output tube is coupled to the gas receiving tube to form a supply pipeline. The output tube is configured for a user to wear and to output the breathing gas from the supply pipeline to the user. The flame arrester is configured in the supply pipeline. Accordingly, the safety of the breathing equipment could be improved.
