(54) Title: PACKAGE FOR GOODS

(57) Abstract: A package comprises an outer package (2) having two members (20, 21) connected to one another via a flexible web portion (22). Each member (20, 21) comprises a base panel (200, 210) and two opposite side wall panels (201, 202, 211, 212). One of the side wall panels (201, 211) has an attachment (204, 214) portion extending towards the opposite side wall panel (202, 212). An inner package comprises blister pack members (3) comprising an edge portion (304, 314) attached to the attachment portion (204, 214) of the outer package member (20, 21) such, that in a closed state the goods carried by the blister pack member are facing towards the base panel (200, 210). The members (20, 21) are folded towards each other via the flexible web portion (22). In an open state the outer package members (20, 21) are unfolded and the members (3) can be accessed by folding the blister pack member (30, 31) away from the opposite side (202, 212) wall panel.
