(54) Title: TRANSACTION IMPLEMENTATION METHOD AND APPARATUS, DEVICE, AND STORAGE MEDIUM

(54) 发明名称: 一种交易实现方法、装置、设备及存储介质

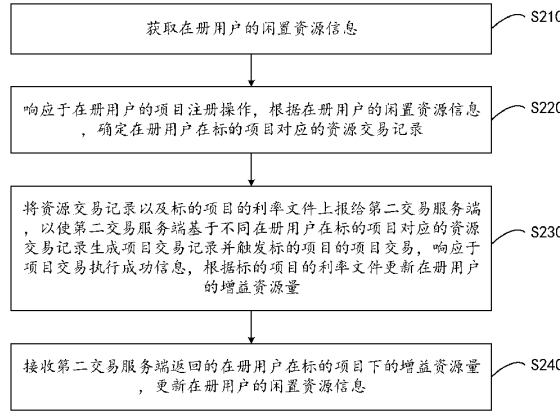

图 2

S210 Acquire idle resource information of a registered user
S220 In response to a project registration operation of the registered user, determine, on the basis of the idle resource information of the registered user, a resource transaction record of the registered user corresponding to a target project
S230 Report the resource transaction record and a yield rate file of the target project to a second transaction server, so that the second transaction server generates a project transaction record on the basis of resource transaction records of different registered users corresponding to the target project and triggers a project transaction of the target project, and in response to project transaction execution success information, updates a gain resource amount of the registered user on the basis of the yield rate file of the target project
S240 Receive the gain resource amount of the registered user under the target project returned from the second transaction server, and update the idle resource information of the registered user

(57) Abstract: Embodiments of the present application provide a transaction implementation method and apparatus, a device, and a storage medium. A method applied to a first transaction server comprises: in response to a project registration operation of a registered user, determining, on the basis of idle resource information of the registered user, a resource transaction record of the registered user corresponding to a target project; reporting the resource transaction record and a yield rate file of the target project to a second transaction server, so that the second transaction server generates a project transaction record on the basis of resource transaction records of different

registered users corresponding to the target project and triggers a project transaction of the target project, and in response to project transaction execution success information, updates a gain resource amount of the registered user on the basis of the yield rate file of the target project; and updating the idle resource information of the registered user. In the embodiments of the present application, comprehensive resource transactions for any registered user are implemented from the dimension of a target project, thereby ensuring the flexibility and accuracy of transaction implementation.

(57) 摘要: 本申请实施例提供了一种交易实现方法、装置、设备及存储介质。其中, 应用于第一交易服务端的方法包括: 响应于在注册用户的项目注册操作, 根据在注册用户的闲置资源信息, 确定在注册用户在标的项目对应的资源交易记录; 将资源交易记录以及标的项目的利率文件上报给第二交易服务端, 以使第二交易服务端基于不同在注册用户在标的项目对应的资源交易记录生成项目交易记录并触发标的项目的项目交易, 响应于项目交易执行成功信息, 根据标的项目的利率文件更新在注册用户的增益资源量, 以更新在注册用户的闲置资源信息。本申请实施例从标的项目的维度实现任一在注册用户的全面资源交易, 确保交易实现的灵活性和准确性。
