

ABSTRACT

The present invention provides an access control method and a communications device. The method includes: sending first information and/or first indication information to a first target end, where the first information includes at least one of the following: index information of a second authentication server, vendor-related information of the first communications device, and address-related information of the second authentication server; and the first indication information is used for requesting to obtain a credential related to a first network, or used to indicate that an access type is a restricted service.
