(54) Title: CENTRALIZED CLIENT INTERFACE FOR FACILITATING CREDENTIAL-LESS NETWORK-BASED COMMUNICATION EXCHANGES BETWEEN PARTICIPATING MEMBER PLATFORMS

FIG. 13

(57) Abstract: Various embodiments of the present disclosure provide techniques for facilitating a credential-less exchange over a network using a plurality of identifier mapping and member interfaces. The techniques may include receiving, by a client device, user input to an icon corresponding to a software container within a central interface repository. The techniques include providing, using a member-client interface, a container activation request based on the user input. The techniques include receiving, using the member-client interface, a universally unique ephemeral key (UUEK) for the software container, storing the UUEK within the software container for a temporary time period, and providing a message transmission that identifies the UUEK and initiates an exchange request.
