

[Abstract]

NASAL COMPOSITION

The purpose of the present invention is to provide: a composition for treating acute rhinitis and allergic rhinitis; and a method for treating acute rhinitis and allergic rhinitis. Specifically, the present invention pertains to a composition that comprises, per 100 mL of the composition, chlorpheniramine or a pharmaceutically acceptable salt thereof in an amount of 200-1000 mg as expressed in terms of chlorpheniramine maleate, and oxymetazoline or a pharmaceutically acceptable salt thereof in an amount of 10-100 mg as expressed in terms of oxymetazoline hydrochloride; and a method for treating acute rhinitis and allergic rhinitis by spraying the composition into a nostril once a day or twice a per day at an interval of 10 hours or more.
