ning of each regular issue of the PCT Gazette.*

(54) Title: BIODEGRADABLE OR COMPOSTABLE CONTAINERS

(57) Abstract: The present invention provides an improved method and materials for forming biodegradable containers that can hold food products in dry, damp or wet conditions and provides the biodegradable containers prepared according to the disclosed process. The containers are produced through the use of a pre-gelled starch suspension that is unique in its ability to form hydrated gels and to maintain this gel structure in the presence of many other types of materials and at low temperatures.
