

[NAME OF DOCUMENT] ABSTRACT

[SUMMARY]

[PURPOSE]

5 The invention provides a novel therapeutic agent or
prophylactic agent for cognitive disorders.

[SOLUTION MEANS]

10 The invention provides an antibody that participates
in antigen-antibody reaction specifically with tau
protein that has been phosphorylated in the vicinity of
Ser413 of SEQ ID NO: 1, and a therapeutic agent or
prophylactic agent for cognitive disorders comprising as
an active ingredient a peptide that has been
phosphorylated in the vicinity of Ser413.
