(54) **Title:** AN INTERFACE FOR USE WITH A VIDEO COMPRESSION SYSTEM AND METHOD USING DIFFERENCING AND CLUSTERING

FIG. 5

(57) **Abstract:** The disclosure relates to a system and method having a common interface to manage and integrate secure information traversing a network with disparate domains. The system and method are capable of rapidly taking external data sources (for example, systems, databases, streams, repositories, websites, etc.) and fusing them under a mediated meta-data layer that allows for data mining, manual and automated analysis and various visualization capabilities in a single application. The system allow for the capability of using data sources, and making secure and appropriate visualization and interoperability functions available in a single portal or interface.
