

ABSTRACT

5 METHODS AND SYSTEMS FOR IMPROVING PLAY OF A BONUS GAME ON A GAMING MACHINE AND IMPROVING SECURITY WITHIN A GAMING ESTABLISHMENT

Methods and Systems for improving play of a bonus game on a gaming machine and improving security within a gaming establishment are described. The systems include a gaming machine, which includes an input device that receives an input from a user. The
10 gaming machine further includes a first display device that displays a primary game upon receiving the input, and a second display device including a multilayer display that displays a secondary game. The multilayer display includes a foreground screen and a background screen, with at least a portion of the foreground screen or the background screen being curved and the foreground screen or the background screen displays an image of a wheel.
15 The gaming machine further includes a controller configured to execute the primary and secondary games. The secondary game is played after playing the primary game.
