(54) Title: RECORDING INK, INK CARTRIDGE, INK RECORD, INKJET RECORDING APPARATUS AND INKJET
RECORDING PROCESS

(57) Abstract: The object of the present invention is to
provide a recording ink having excellent color developing
properties and high delivery stability, by which not only the
color saturation of the obtained image can be remarkably
improved, but also the image having a high quality can be
formed. For this object, the present invention provides a
recording ink used for an inkjet recording using a dye ink
and a pigment ink properly alternately through one inkjet
head, wherein the dye ink and the pigment ink have respec-
tively a viscosity at 25 °C of 5 mPa·s or more and the differ-
ence between the viscosity of the dye ink and the viscosity
of the pigment ink is 3 mPa·s or less.
