(54) Title: STENCIL PRINTING FRAME

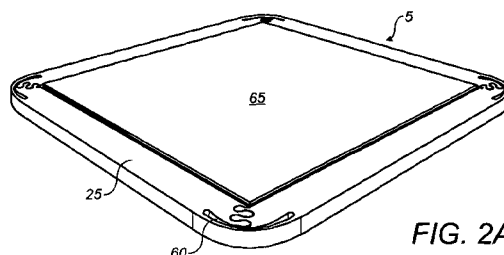

FIG. 2A

(57) Abstract: The present invention provides a stencil printing frame comprising a border member (5) and a foil sheet (65) attached thereto, wherein the border member (5) is formed as a single piece having sides and corners that define the frame, the single piece having two ends interlocked to form a joint on one corner or side, and wherein at least one corner comprises abutting faces arranged to prevent relative movement of the faces. The invention further provides a method for forming the frame and for uses of the frame once formed.
