

ABSTRACT

Substituted 2,3-dihydroimidazo[1,2-c]quinazoline Derivatives Useful for Treating Hyper-Proliferative Disorders and Diseases Associated with Angiogenesis

This invention relates to novel 2,3-dihydroimidazo[1,2-c]quinazoline compounds, pharmaceutical compositions containing such compounds and the use of those compounds or compositions for phosphatidylinositol-3-kinase (PI3K) inhibition and treating diseases associated with phosphatidylinositol-3-kinase (PI3K) activity, in particular treating hyper-proliferative and/or angiogenesis disorders, as a sole agent or in combination with other active ingredients.
