(54) Title: METHOD FOR EXCHANGE OF DATA AND USER INTERFACE COMPONENTS

(57) Abstract: A method for exchange of data and user interface components over a network, the method including the steps of: (a) enabling a first user to logon to a server; (b) enabling the first user to create a message containing a data object; (c) receiving from the first user the message together with an identity of at least one second user to whom the message is to be sent; (d) sending the message to the second user upon the second user logging on to the server; and (e) enabling both the first user and the second user to substantially simultaneously open and view the message including the data object.
