(54) Title: COMPOSITIONS AND METHODS FOR ENHANCING MOBILIZATION AND PROLIFERATION OF BLASTOMERE-LIKE STEM CELLS

(57) Abstract: The present invention provides a method of using mobilization agents to enhance stem cell trafficking in a subject, including very small embryonic-like (VSEL) stem cells. In one embodiment, a blended composition of algae, fruits, mushrooms, microorganisms, maternal fluids, and extracts thereof are used to promote trafficking of stem cells, resulting in migration of the stem cells to specific sites of maintenance and repair within tissues and/or organs.
