

## ABSTRACT

DEVICE AND SYSTEM FOR REPRESENTING HITS BY SHOTS AND/OR  
ROCKETS AND METHOD FOR SAME

5

The present invention relates to a device (10) for representing hits by shots and/or rockets, a corresponding system for same and an associated method.

Disclosed is a device (10) which is capable of flight and provides means (12) for optical and/or acoustic representation of hits. The device (10) and the means (12)  
10 can be remotely controlled and can be controlled from a control centre (30). For the purpose of control, the control centre (30) can locate objects capable of being located via positioning satellites (50) and control the device (10) according to the location.
