

ABSTRACT

A STRUCTURAL BUILDING ELEMENT

A structural building element (1) is formed by two spaced apart parallel flanges (2,3) joined by a longitudinally extending web (4). Web(4) is made up of a plurality of linear segments (5,6,7,8) arranged in a repeating sequence to respectively extend along the flanges (2,3) adjacent one longitudinal edge (9,10), across the flanges (2,3), along the flanges (2,3) adjacent an opposite longitudinal edge(11,12), and across the flanges (2,3).
