ABSTRACT

Systems, devices, and methods for media processing and streaming, including transmitting, by a 5G media streaming uplink (5GMSu) application provider (AP), a request to create a provisioning session for 5GMSu streaming using a 5GMS system (1202); receiving, by the 5GMSu AP, an acknowledgement corresponding to the provisioning session (1204); and performing, by the 5GMSu AP, a 5GMSu egest operation corresponding to the 5GMSu streaming (1206), wherein the 5GMSu AP is included in an external data network (DN) which is external to the 5GMS system.
