ABSTRACT

To provide a microwave-oven-use paper cup which is not susceptible to burning at a paper-combined portion, even when the paper cup having the contents, such as a drink and instant food, is heated and subjected to cooking in a microwave oven. A paper cup is provided with: a trunk member (1) including a cylinder-shaped trunk portion (11), a top curl portion (12) formed by bending the top end of the trunk portion and a turned-up portion (13) formed by bending the upper end of the trunk portion inward; and a bottom member (2) including a bottom face portion (20) and a bent portion (22) formed by bending the outer circumferential edge of the bottom face portion. The bent portion (22) is sandwiched between the trunk portion (11) and the turned-up portion (13) so that the trunk member (1) and the bottom member (2) are joined to each other. The bottom face portion (20) is formed into a concave shape extending downward.
