(54) **Title:** WHEEL SET BRAKE MECHANISM AND BABY TRANSPORT

FIG. 5

(57) **Abstract:** Disclosed is a wheel set brake mechanism, including: a drive member mounted on the movable frame; and a brake assembly including a drive pin, a traction member and a locking member, wherein the drive pin is operably connected to the drive member, the traction member includes a first cable and a second cable, a first end of the first cable is connected to the drive pin, a second end of the first cable extends into an inner cavity of the hollow shaft to be rotatably connected to a first end of the second cable, and a second end of the second cable is connected to the locking member. The drive member is configured to drive the drive pin to slide so that the traction member causes the locking member to slide to lock the wheel.
