WHAT IS CLAIMED IS:

1. A package of ^{contact lens} medicinal products, comprising:
a first receiver bottle, formed of plastic and containing a contact lens and a protective liquid to clean the contact lens, said bottle having a bottle body with bottle sides, a bottle bottom and a neck formed as a unitary one-piece structure, said neck having inside cross-sectional dimensions greater than dimensions of said contact lens in all directions; and
a stopper coupled to said neck; and
detachable means for releasably coupling said stopper to said receiver bottle, said stopper and said detachable means being formed as a unitary one-piece structure with said receiver bottle, said detachable means having a break line in said neck.
2. A package according to claim 1 wherein
said receiver comprises a bottle body with a neck, said neck having inside cross-sectional dimensions greater than dimensions of the medicinal product in all directions; and
said stopper is coupled to said neck by a break line.
- 2 X. A package according to claim 2 wherein
said break line comprises an annular zone of reduced wall thickness.
- 3 X. A package according to claim 3 wherein
said annular zone comprises a constriction formed in said receiver.
- 4 X. A package according to claim 1 wherein
said receiver is configured as an ampule.

5~~8~~. A package according to claim 2 wherein
said stopper comprises a plug formed on an end of
said stopper opposite said break line, said plug being
receivable within said neck to seal said neck closed.

6~~7~~. A package according to claim 6 wherein
said stopper comprises a cylindrical outside cover
surface of relatively large dimensions adjacent said break line
and two, oppositely arranged, gripping depressions.

7~~8~~. A package according to claim 2 wherein
said stopper comprises gripping means extending
essentially in a radial plane on an end thereof opposite said
break line.

8~~9~~. A package according to claim 2 wherein
said receiver comprises a holding device, inserted
therein and removable therefrom, for holding a contact lens.

9~~10~~. A package according to claim 9 wherein
said holding device is formed separately from said
stopper.

10~~11~~. A package according to claim 9 wherein
said holding devices comprises a threaded portion
threadedly engaged with an associated part of said receiver.

11~~12~~. A package according to claim 9 wherein
said stopper is coupled to said holding device for
simultaneous removal from said receiver.

12~~13~~. A package according to claim 9 wherein
said holding device comprises clamping means for a
folded soft contact lens.

13 ~~14~~. A package according to claim 1 wherein
a second receiver, configured similarly to said first
receiver, is coupled to and located adjacent to said first
receiver; and
a break line extends between said first and second
receivers for separating said receivers.
