(72) Inventor; and

(75) Inventor/Applicant (*for US only*): **MAYERESSE, Yves** [BE/BE]; GlaxoSmithKline Biologicals s.a., Rue de l'institut 89, B-1330 Rixensart Brussels (BE).

(88) Date of publication of the international search report:
16 December 2004

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: DRYING PROCESS

(57) Abstract: The present invention relates to a method of drying biological and other labile samples so that they can be preserved as a highly viscous liquid. The method involves the steps of preparing a preservation sample by dissolving/suspending an active agent in a solution of a stabilising agent, subjecting the preservation sample to such temperature and pressure conditions that the preservation sample loses solvent by evaporation without freezing or bubbling to form a foam and removing solvent until the preservation sample dries to form a highly viscous liquid.
