(54) **Title:** COSMETIC CONTACT LENS HAVING AN ELLIPTICAL DOT PATTERN SUITABLE FOR FORMING AN APPARENT LIMBAL RING

Figure 1

(57) **Abstract:** Described are cosmetic contact lenses having features designed to enhance the appearance of the eyes and to optionally correct vision. In particular, cosmetic contact lenses have elliptical dot patterns designed to overlay irises and thereby form apparent limbal rings. For contact lens wearers with uniformly colored irises, such as dark brown irises, these cosmetic contact lenses provide a more texturized appearance to the eyes with apparent limbal rings.
