

Separator

Abstract

5

Separator for the centrifugal separation of a flowable product into various phases or for the centrifugal clarification of a product, comprising at least the following features: a. a rotatable drum (2) comprising a
10 drum lower section (7) and a drum upper section (8), b. a means arranged in the drum (2) for clarifying a product to be treated in the centrifugal field, wherein c. one, more than one, or all the following elements are made from plastic or a plastic composite: - the drum lower section
15 (7), - the drum upper section (8), - the clarifying means.
