

ABSTRACT OF THE DISCLOSUREROTATABLE FEEDING MEMBER AND
ROTATABLE FIXING MEMBER

5

A rotatable feeding member for feeding a recording material includes a surface layer formed of a resin material, and a character portion including characters selected from alphabetical and numeral
10 characters made visible by recessing the surface layer, wherein the characters are arranged along a circumferential direction of the rotatable feeding member. The characters are slanted with respect to a longitudinal direction of the rotatable feeding member.
