

ABSTRACT

IC CARD, INFORMATION PROCESSING METHOD, COMPUTER READABLE RECORDING MEDIUM AND PROGRAM

An IC card is provided with an IC module. The IC module is provided with a memory section and a control section. The memory section stores information that shows a file structure. The control section receives a first command, transmits a first response containing the information showing the file structure in response to reception of the first command, receives a second command which is transmitted in response to the first response and which includes a first data searched from the information showing the file structure, and sets up the first data in response to reception of the second command.
