

ABSTRACT
MANAGEMENT SYSTEM

A management system (210) in a facility providing games using
5 a game table (5004) having play positions is provided with a
member's card (810) having a card RFID tag (811) storing
member information built in, and card RFID reader (711, 54),
which is installed at the play position of the game table
(5004) and reads the member information from the card RFID tag
10 (811).
