

**BATTERY-ELECTRICITY PROPULSION SHIP ELECTRIC POWER FEED SYSTEM,
OFFSHORE ELECTRIC POWER FEED FACILITY, AND BATTERY-ELECTRICITY
PROPULSION SHIP**

ABSTRACT

There is provided a battery-electricity propulsion ship electric power feed system capable of charging a rechargeable battery of a battery-electricity propulsion ship without mooring the battery-electricity propulsion ship at a quay wall. The battery-electricity propulsion ship electric power feed system includes at least one battery-electricity propulsion ship and at least one offshore electric power generation facility capable of charging a storage battery of the battery-electricity propulsion ship.
