GAMING DEVICE

Enable a player to wager on one or more of a plurality of different starting symbol display positions
102
Randomly generate a plurality of directional symbols at a plurality of symbol display positions
104
106
For each wagered on starting symbol display position, is the output direction of the directional symbol generated at that wagered on starting symbol display position compatible with an input direction of a directional symbol generated at an indicated symbol display position?
No
Yes
Do not form any set of compatible directional symbols for the wagered on starting symbol display position
110
Form a set of compatible directional symbols for the wagered on starting symbol display position
108
112
Is at least one set of compatible directional symbols formed?
No
Yes
114
For each incomplete formed set of compatible symbols, is the output direction of the most recently added directional symbol compatible with any input direction of any directional symbol generated at any indicated symbol display position?
No
Yes
Mark the formed set of compatible symbols as complete
116
Add the directional symbol generated at the adjacent symbol display position to the formed set of compatible directional symbols
118
120
Are each of the formed sets of compatible directional symbols marked as complete?
Yes
No
Determine an award for each complete set of compatible directional symbols
122
Provide the player any determined awards
124
